

# AIM CROP INSURANCE COMBO GUIDE -- 2011 CY

Beginning with the 2011 Crop Year, RMA created a Common Crop Insurance Policy, known as the COMBO policy, to merge the APH, CRC, RA, & IP plans into a single insurance plan. The new COMBO plan will simplify the insurance process, and promote a better understanding of the options available for producers. RMA also developed a single rating and pricing component so that all insurance coverage is consistent in insurance protection and cost to producers.

CROPS COVERED For 2011 Crop Year	
Wheat	Corn
Barley	Cotton
Soybeans	Grain Sorghum
Sunflowers	Canola

## PRODUCER OPTIONS FOR 2011

## INSURANCE PLAN CONVERSION CHART

2010 Policy	2011 COMBO Policy

Revenue Assurance (RA) w/o Fall Harvest Price Option	Revenue Protection with Harvest Price Exclusion
Actual Production History (APH) (CAT Endorsement)	Yield Protection (CAT Endorsement)
Income Protection (IP)	Revenue Protection with Harvest Price Exclusion
GRP	GRP
GRIP	GRIP

## IMPORTANT DEFINITIONS

**Revenue Protection** Insurance coverage provides protection against production loss or price decline or increase or a combination of both.

**Revenue Protection with Harvest Price Exclusion** Insurance coverage that excludes the use of the harvest price in the determination of the revenue protection guarantee.

**Yield Protection** Insurance coverage that only provides protection against a production loss for crops.

**Commodity Exchange Price Provisions (CEPP)** A part of the policy that is used for all crops for which revenue protection is available. All the information necessary to derive the projected price and the harvest price for the insured crop is available.

**Projected Price** is the price determined in accordance with the CEPP and used for all crops for which revenue protection and yield protection are available.

**Harvest Price** is the price determined in accordance with the CEPP and used to value production to count under revenue protection.

**Revenue Protection Guarantee (per acre)** For revenue protection only, the production guarantee (per acre), times the greater of the projected price or the harvest price. If the harvest price exclusion option is elected, the production guarantee (per acre) is multiplied by the projected price.

**Yield Protection Guarantee (per acre)** For a crop with yield protection only, the production guarantee (per acre), times the projected price.
